Notes

1 Dept for Transport RAS30045, updated: 26 September 2019, sourced STAT19 + ONS mid-year population estimates

2 Miles walked by LA, sourced DfT NTS9904 (2017-2018), with Rural/Hub Town/Urban LA weighting (Defra RUC11_LAD11) applied.

3. Central London boroughs injury figures are highly inflated by significant numbers of tourists and commuters who are non-resident (Viz City of London - 9.4k residents). No reliable estimates for this extra exposure are available; accordingly the risk values for central London LAs (esp City of London) are likely to be highly overstated.
